

# SKF – the knowledge engineering company

From the company that invented the self-aligning ball bearing more than 100 years ago, SKF has evolved into a knowledge engineering company that is able to draw on five technology platforms to create unique solutions for its customers. These platforms include bearings, bearing units and seals, of course, but extend to other areas including: lubricants and lubrication systems, critical for long bearing life in many applications; mechatronics that combine mechanical and electronics knowledge into systems for more effective linear motion and sensorized solutions; and a full range of services, from design and logistics support to conditioning monitoring and reliability systems.

Though the scope has broadened, SKF continues to maintain the world's leadership in the design, manufacture and marketing of rolling bearings, as well as complementary products such as radial seals. SKF also holds an increasingly important position in the market for linear motion products, high-precision aerospace bearings, machine tool spindles and plant maintenance services.

The SKF Group is globally certified to ISO 14001, the international standard for environmental management, as well as OHSAS 18001, the health and safety management standard. Individual divisions have been approved for quality certification in accordance with ISO 9001 and other customer specific requirements.

With over 120 manufacturing sites worldwide and sales companies in 70 countries, SKF is a truly international corporation. In addition, our distributors and dealers in some 15 000 locations around the world, an e-business marketplace and a global distribution system put SKF close to customers for the supply of both products and services. In essence, SKF solutions are available wherever and whenever customers need them. Overall, the SKF brand and the corporation are stronger than ever. As the knowledge engineering company, we stand ready to serve you with world-class product competencies, intellectual resources, and the vision to help you succeed.

## Maintaining a 350 km/h R&D lab

In addition to SKF's renowned research and development facilities in Europe and the United States, Formula One car racing provides a unique environment for SKF to push the limits of the complex and fully diversified bearing related technology. A Ferrari single-seat car utilizes more than 150 SKF components. Lessons learned here are applied to the product we provide to automakers and the aftermarket worldwide.

# SKF knowledge at your fingertips

## The quick and easy way to access our online parts catalogue.

Now you can take advantage of our new automotive parts catalogue application for the iPhone. It gives you instant access to the very latest product information and technical data. Not to mention product images and engine diagrams. You can search using various parameters such as car model, kit designation and OE number. What's more, it's free. Simply download the "SKF Automotive parts search" app from the Apple iTunes App store.

## English

The following bearings have an integrated magnetic impulse wheel in one of the seals. In order for the ABS (Anti lock Braking System) to work properly it is vital that the bearing is correctly handled and mounted on the vehicle. The seal containing the encoder cannot always be visually identified so it is recommended to use a Magnetic Encoder Detector to ensure the correct side is mounted facing the sensor on the vehicle.

## Deutsch

Folgende Radlager haben einen integrierten Impulsring auf einer Seite. Für die visuelle Identifikation können Sie die ABS-Magnetfeldkarte nutzen. Für die einwandfreie Funktionsweise des ABS-Systems muss die Impulsring-Seite zum Fahrzeug hin montiert werden.

## Français

Les roulements suivants contiennent une bague d'impulsion magnétique, intégrée dans un des joints. Afin que le système ABS fonctionne correctement, il est impératif que le roulement soit correctement manipulé et monté sur le véhicule. Il est parfois impossible de voir à l'oeil nu de quel côté se trouve la bague ABS, il est donc recommandé d'utiliser un détecteur de capteur magnétique, afin de garantir que le roulement sera monté du bon côté.

## Italiano

I seguenti cuscinetti ruota hanno una tenuta encoder ad impulsi di tipo magnetico, integrata su un lato del cuscinetto. Affinchè l'ABS (Sistema antibloccaggio dei freni) lavori correttamente è importante prestare la massima cura nel maneggiare e nel montare il cuscinetto sul veicolo. La tenuta del cuscinetto ruota con encoder integrato non può essere sempre visivamente identificata, pertanto è necessario usare il rilevatore magnetico di encoder fornito da SKF, per identificarlo e assicurare che il cuscinetto/tenuta sia orientato di fronte al sensore ABS presente sul veicolo.

## Español

Los siguientes rodamientos incorporan una rueda emisora de impulsos magnéticos integrada en el retén. Para que el ABS (Sistema Antibloqueo de Frenos) funcione perfectamente es vital que el rodamiento se manipule y monte correctamente en el vehículo. Como en muchos casos el retén que incorpora la rueda emisora de impulsos no puede ser visualmente identificable, se recomienda utilizar un detector de codificación magnética para determinar cual de las caras de la unidad de cubo HBU1 es la que integra la rueda emisora de impulsos y, por lo tanto, la cara apropiada que debe instalarse frente al sensor de ABS.

## Nederlands

De volgende lagers hebben een geïntegreerde magnetische impulsring in één van de afdichtingen. Om een correcte werking van het ABS systeem van de auto te garanderen is het van vitaal belang dat het lager op de juiste manier gemonteerd wordt. Het is soms onmogelijk om met het blote oog te zien welke kant de ABS ring bevat, en daarom adviseren wij om gebruik te maken van een magnetische coderingsdetector om er zeker van te zijn dat het lager correct gemonteerd wordt.

## Polski

Następujące łożyska posiadają zintegrowany pierścień ABS w jednej z uszczelek. Aby system ABS działał poprawnie ważne jest, aby łożysko było poprawnie zainstalowane na pojeździe. Uszczelka zawierająca pierścień nie zawsze może być wizualnie zidentyfikowana. Dlatego zalecamy używanie detektora magnetycznego pierścienia w celu upewnienia się, że łożysko zamontowane jest odpowiednią stroną względem czujnika na pojeździe.

Följande lager har ett integrerat magnetiskt impulshjul i en av tätningarna. För att säkerställa optimal funktionalitet i ABS systemet är det mycket viktigt att lagret hanteras och monteras korrekt. Det i tätningen ingående impulshjulet kan inte alltid ses, därför rekommenderas att använda en magnetdetektor för att säkerställa rätt sida monteras vänd mot fordonets sensor.

Эти подшипники имеют интегрированное магнитное импульсное кольцо на одном из уплотнений. Чтобы система ABS работала должным образом необходимо, чтобы подшипник был правильно установлен на транспортное средство. А так как уплотнение, содержащее кодирующее устройство, не может всегда быть идентифицировано визуально, рекомендуется использовать Магнитный Датчик Кодирующего устройства, чтобы гарантировать правильную сторону установки подшипника на транспортное средство.

Følgende lejer har et integreret magnetisk magnetring i en af tætningerne. For at sikre den optimale funktion af ABS systemet, er det meget vigtigt, at lejet håndteres og monteres korrekt. Impulsringen i tætningen er ikke altid synlig, derfor anbefales det at anvende en magnetdetektor for at sikre, at det er den korrekte side, som monteres mod bilens sensor.

## Soumi

Seuraaviin laakereihin on tiivisteseen integroitu magneettinen ABS-impulssirengas. Laakerin oikea käsittely on erittäin tärkeää ABS-jarrujen toiminnan kannalta. Useimmissa tapauksissa laakerin magneettinen puoli on vaikeaa erottaa tavallisesta tiivisteestä. Magneettisen kooderitunnistimen avulla voidaan helposti katsoa, kummalla puolella laakeria on magneettinen impulssirengas, jotta laakeri tulee asennettua oikein anturia kohti.
